

Architecture and Landscape Building Material Sample Collection : A Visual Resource

Project Summary *(150 words maximum)*

The objective of this project is to create an online Visual Building Material Resource Library for the enhancement of Teaching, Learning & Research for The School of Architecture + Landscape Architecture (SALA) + Environmental Design.

The collection will provide images and samples of current product materials worldwide with emphasis on LEED green products.

To provide engagement of materials and generate research, augmenting the existing physical Materials Library.
